

PFC Corofil Quickpass Cable Seal

PFC Corofil Quickpass Cable Seal provides a dependable, engineered, firestopping solution for cable management, in fire rated walls and floors. Tested to BS476 Part 20:EN1366:3, PFC Corofil Quickpass Cable Seal has been shown to provide up to 2 hours fire protection.

- Simple and fast to install
- Can be retro-fitted and built into fire compartments for future cable runs
- Easy to audit
- Maintenance free
- Dry system

Description

PFC Corofil Quickpass Cable Seal consists of a red metallic tube, lined with a rigid intumescent material. In a retro-fit scenario, where cabling already passes through walls or floors, both the metallic and intumescent components of this system are simply eased apart and reassembled around the cable bunches

Quickpass Cable Seal can then be sealed within the wall or floor using PFC Corofil Firestop Compound or in core drilled holes with annular gaps of up to 10mm wide with PFC Corofil Acoustic Intumescent Sealant, leaving a robust and permanent firestop.

Currently, the integrity of firestopping seals is often breached during cable maintenance and upgrade works. Quickpass Cable Seal can be installed empty or completely full of cables. This flexibility allows cables to be pulled at a later date without any of these worries!
